Projects

- **Designed an headphone product based application (2024):** Using Figma, I have developed a product-based app for Oza headphones with the goal of providing a smooth and aesthetically pleasing user experience. To improve user involvement with the product, the design Include engaging interface, easy-to-navigate navigation, and seamless transitions. My proficiency in UI/UX design and meticulous attention to detail in developing a user-friendly headphones app are demonstrated by this project. ([Link](#))
- **Designed an Static ecommerce website for clothing(2024):** I have used Figma to design a static eCommerce website for a clothing brand, with an emphasis on a user interface that is both aesthetically pleasing and intuitive. The design puts an emphasis on simple aesthetics, intuitive navigation, and a seamless user experience. It highlights my abilities in UI/UX design and my attention to detail in creating a compelling online store. ([Link](#))
- **Designed Disney clone movie website(2024):** I have used figma to create a movie website clone of Disney, with the goal of imitating the recognizable user interface with slick transitions and colorful graphics. The overall watching experience is improved by the design, which places a strong emphasis on an easy-to-use interface, captivating

graphics, and simple navigation. This project demonstrates my capacity to produce immersive UI/UX solutions and replicate intricate designs.([Link](#))
